

Project Title:

AI-Powered Career Guidance & Skill Recommendation Agent

SDG Alignment:

SDG 8 – Decent Work and Economic Growth

1. Problem

- Students and fresh graduates struggle to identify suitable career paths
 - Lack of awareness about required skills for different job roles
 - Results in unemployment and underemployment
-

2. Customer Segments

- College students
 - Fresh graduates
 - Job seekers
 - Career counselors
-

3. Unique Value Proposition

- Personalized AI-based career guidance
 - Skill gap identification and learning suggestions
 - Easy-to-use and accessible solution
-

4. Solution

- AI-powered agent that:
 - Analyzes user skills
 - Recommends job roles
 - Suggests required skills and learning paths
-

5. Key Metrics

- Number of users guided
 - Accuracy of job role recommendations
 - Improvement in user skill awareness
-

6. Channels

- Web-based application
 - Educational platforms
 - Career guidance portals
-

7. Cost Structure

- Development time
 - Cloud infrastructure (future scope)
 - Maintenance and updates
-

8. Revenue Streams (Optional / Future)

- Institutional subscriptions
 - Career counseling partnerships
 - Premium personalized guidance
-

9. Social & Economic Impact

- Improved employability
- Reduced skill mismatch
- Contribution to economic growth
